WHY TAYLOR'S?

The New West is more than a tagline. It's a way of life. When you rely on the firepower of your forefathers, you're a part of the New West. When you believe in time-honored traditions like carrying reliable firearms, you live and breathe the New West. When you holster a Taylor's gun at your side, you epitomize the New West.

TAYLOR'S IS...

- Historically accurate reproductions
- Vast selection—a fit & finish for everyone
- Endlessly reliable
- · Pristine quality control—every time
- · Relentless customer service
- The ultimate marriage of old meets new
- An evolutionary meeting the needs and standards of modern shooters

LIVE IN THE NEW WEST.

TUNED TO PERFECTION.

If you love something, make it your own. That's the solemn promise of our selection of firearms available with Taylor's & Company's own custom tuning. Our gunsmiths are poised to achieve perfection. When you see this "T," you know you're in the midst of true excellence.

WHY TAYLOR TUNED?

- CUSTOM upgrading by our Winchester, Virginia artisans
- HAND-TUNING and a fresh polish from our tireless gunsmiths
- ENHANCEMENT thru lightened hammer and trigger pull with custom springs

A FIT AND FINISH FOR EVERYONE.

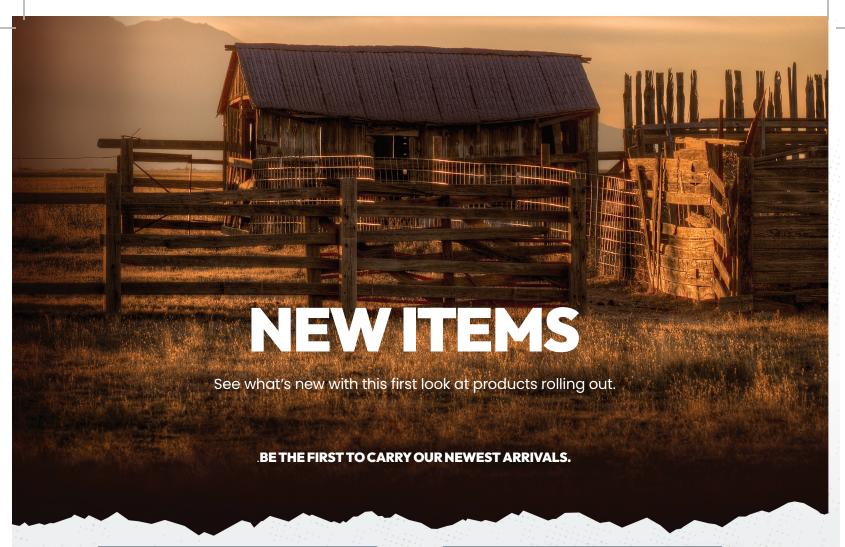

There's no firearm enthusiast or gun-owner in the making that will walk away empty-handed in the Taylor's lineup. Your customers are our clientele. There's a Taylor's fan in everyone. Taylor's takes all comers. Trailblazers. Modern ranchers. Competitors. Heritage collectors. The gang's all here.

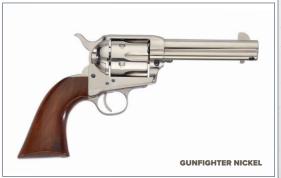

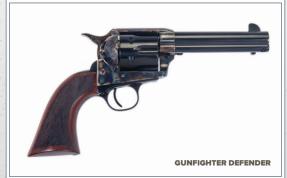

GUNFIGHTER NICKEL ①

Features: An expansion to our very popular Gunfighter series. The Gunfighter Nickel features the customer favorite large army-size grip. The nickel plated revolver is a flashy looking piece with charcoal blue screws for a finishing touch. Grips are smooth walnut, and the frame is a forged steel frame. Taylor Tuned action is available.

THE 1873 CATTLEMAN

Every one of our Cattleman models tells a story. The trusted sidearm of ranchers of yesteryear, it's an ideal entry point into the world of New West reproductions for any fresh firearm fan. No stranger to a dust-up, it's an across-theboard winner that checks all the right boxes.

EXPLORE THE COLLECTION.

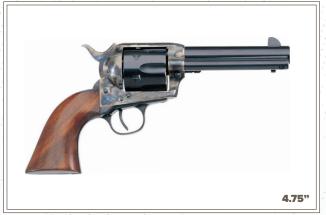

TAYLOR'S TIP:

The rear sight is located on the top of the frame. A channel is cut out with a sight notch. This is a historically accurate feature of the 1873 Single Action.

THE 1886 TAKEDOWN CLASSIC & STANDARD RIFLE

Originally created by John Browning, the 1886 lever-action design provides incredible strength and durability. The 1886 Takedown features the versatile option of breaking the rifle in two for easy maneuvering. The 1886 makes a great traditional hunting rifle.

TAYLOR'S TIP: Our modern reproduction uses modern metallurgy with a twist rate suitable for today's ammunition.

ITEM	MODEL	CALIBER	CAPACITY	BARREL LENGTH	FINISH NOTES
220076	1886 STANDARD RIFLE	.45-70	8	26" OCTAGON	C/H RECEIVER BLUE BARREL

THE 1873 RIFLE SERIES ®

1873 RIFLE FULL OCTAGONAL BARREL - STRAIGHT STOCK

The 1873 model became an immediate favorite upon it's release by the Winchester Repeating Arms Company. Thoughts were that the domestic military sales would make up most of the orders for the leveraction, but this model ended up being more popular with civilians and international military. The 1873 Rifle was the first lever-action available with a broad variety of options, and it's still offered today in many varieties to meet all types of shooters' needs.

TAYLOR'S TIP: The most traditional variant of the 1873 Rifle is the classic smooth straight stock.

ITEM	MODEL	CALIBER	BARREL LENGTH	CAPACITY	FINISH NOTES
550054	1873 RIFLE - STRAIGHT STOCK	.44-40	20" OCTAGON	10+1	C/H FRAME BLUE BUTTPLATE

550114	1873 RIFLE - STRAIGHT STOCK	.38-40	20" OCTAGON	10+1	C/H FRAME BLUE BUTTPLATE

No. of Grooves: 6 | Twist: Right | Total Length*: 39.25" | Weight*: 7.9 lbs.

1873 RIFLE FULL OCTAGONAL BARREL - PISTOL GRIP STOCK @

TAYLOR'S TIP: There is no clear advantage of a pistol grip stock versus a straight stock. Many shooters find they can acquire their sights faster on one versus the other. It's all about how the rifle feels when you bring it to your shoulder.

ITEM	MODEL	CALIBER	BARREL LENGTH	CAPACITY	FINISH NOTES
550234	1873 RIFLE - PISTOL GRIP STOCK	.44-40	20" OCTAGON	10+1	C/H FRAME BLUE BUTTPLATE

1873 TAYLOR'S TRAPPER RIFLE

The most traditional variant of the 1873 Rifle is the classic smooth straight stock. The Taylor's Trapper model features a handy 18" barrel length for a lightened weight and faster movement on target groups.

TAYLOR'S TIP: The Trapper holds ten rounds in the magazine tube. An ideal choice for many competition shooting disciplines.

1873 CARBINES - ROUND BARREL

The 1873 Carbine is a lightweight variation of the iconic lever action. The short round barrel means less heft and more maneuverability whether hunting, competing, or simply enjoying time at the range. They feature a barrel band and a flat butt plate shape. The carbine is made to move. The rifles also are a great option for younger shooters, as they are the lightest 1873 Rifle variation available.

TAYLOR'S TIP: The Carbine models traditionally feature a solid blued receiver. Case Hardened receivers are available, but not as common on the 1873 Carbine.

TAYLOR'S TIP: The 1873 Carbine models feature a rear ladder sight and the front sight is fixed on a barrel band.

ALL 1873 RIFLES ARE MANUFACTURED WITH A FORGED STEEL RECEIVER FOR STRENGTH AND DURABILITY. THE CASE-HARDENED

FINISH PICTURED HERE HELPS MAINTAIN AUTHENTICITY.

THE 1892 EVER-ACTION

One of the most popular lever-actions of all time, the 1892 was designed by John M. Browning. This smaller version of his Model 1886 used the popular short cartridges of the 1873 but had a simplified ramp elevator. Today, variations include short trapper models, carbines and long, traditional-length models in a variety of finishes.

TAYLOR'S TIP: Not only does the 1892 handle modern ammunition great for hunting purposes, it also is a lighter weight rifle with a smaller receiver size than 1873 and 1866 rifles.

THE MODEL 1894

Several lever-actions hold significance in American history, but only one model truly won the favor of hunters and shooters across the country: The Model 1894. Designed with power and practicality in mind, John M. Browning was the innovative mind behind the first sporting rifle that was made to handle the new high-velocity, smokeless powder ammunition introduced in the late 19th Century. With its ease of operation, quick handling, and chambering for one of the most popular hunting cartridges, 30-30 Winchester, the Model 1894 is a classic design that is just as dependable and revered today since its introduction in 1894.

REMINGTON **CONVERSION**

This versatile firearm provides for an easy transition from black powder to centerfire cartridges. Along with the original conversion design, these revolvers retain other original Features: the forged frames are dovetailed to allow the loading gate assembly to slide into place and a modern ejector rod incorporated into the original black powder loading lever with a small notch cut into the loading lever itself. Manufactured with a forged frame. The Lawdawg® Remington Conversion is offered with or without engraving. The blue finish is complemented by a two-piece ivory grip. The Lawdawg® is the perfect upgrade for this conversion model.

1886 RIDGE RUNNER ♡

Originally created by genius gunsmith John Browning and produced from 1886 to 1935, the 1886 leveraction design provides incredible strength and durability. Our modern reproduction uses modern metallurgy with a twist rate for today's ammunition. The Ridge Runner has a high-visibility front sight, weaver rail sight, D-Shape lever, and rubber soft touch coating over wood. The Ridge Runner is offered in two versions: matte chrome or matte black. Barrel thread is 5/8 x 24 and muzzle brake is included.

TAYLOR'S TIP: The Ridge Runner is a perfect choice for serious hunters looking for a hard-hitting lever-action to drop any North American big-game animal.

THE ALASKAN TAKEDOWN

This is a modern version of the 1892 Lever-Action, which was originally designed for the Cowboy Action Shooter. Now, it's redesigned specifically for the hunting market.

- Easy reassembly with no tools necessary
- Over-molded black rubber "soft touch" coating
- Padded stock end
- D-shape lever

- Skinner express style rear sight system
- Barrel drilled and tapped for optics
- Threaded barrel available in 5/8 x 24

1886 RIFLE - TC86 TAKEDOWN

The TC86 Takedown is a hunting rifle where style meets function. Made for the ultimate expedition, while maintaining a finish fit for a classic design. With the take down feature the rifle becomes a versatile companion for the hunt, the hike, or to hit the road. Choose your adventure! The color case receiver and checkered pistol grip walnut stock combine function with style. A rubber butt plate absorbs recoil, and the wide lever size allows for easy use in all conditions. Includes the weaver rail sight with a skinner peep sight on it.

THE HAMMER COACH GUN

This reproduction is an Old West classic, as its namesake was carried by many stagecoach, railroad, and payroll guards. The model features a double-barrel and Victorian-era, rebounding mule-ear external hammers. The pistol grip stock features attractive laser checkering, and it comes with double triggers and is chambered for three-inch shells. The fit and finish are much improved from the 1878 Coach Gun, and the quality is highly regarded among competitive Cowboy Action Shooters and modern day sportsmen alike.

Length of pull is 14.5". Includes fixed cylinder chokes.

Total Length: 37.25" | Weight: 6.7 lbs.

HAMMER COACH GUN

230000

TAYLOR'S TIP: The Coach Gun models are a great choice for competition shooters in Cowboy Action.

The hammers are close together, which is preferred for the sport.

12 GAUGE

20"

THE WYATT-EARP COACH GUN

The Wyatt Earp side-by-side shotgun allows for fast shell loading. Shell extraction is quick, and the hammers are easy to cock. The walnut pistol-grip stock is checkered. The Wyatt Earp shotgun by Pedersoli is functional and performs well for any shooting discipline. Length of pull 14.25". Features chrome-lined barrels. Chokes are fixed improved cylinder (L) and cylinder (R). Offered with or without Wyatt Earp stamped on the frame.

1887 LEVER-ACTION SHOTGUN

Designed by John Browning for the Winchester Repeating Arms Company, this model was considered the first of many successful repeating shotguns. A favorite of collectors and cowboy action shooters, the firearm is also ideal for hunting with a five-shell magazine plus one in the chamber. 1887 Shotguns in 22" and 28" barrel lengths are sold with three Old-Style Beretta Chokes & Wrench. Holds 2-3/4" Shell.

1887 BOOTLEG & T-MODEL

TAYLOR'S TIP: The 1887 Bootleg models may look like a handful, but they absorb recoil well because they are steel and wood.

The Taylor Tuned action is a custom upgrade for shooters wanting a stellar performing revolver or rifle right out-of-the-box. Taylor Tuned action work is performed right at our facility in Winchester VA. Our skilled inhouse gunsmiths fine tune 1873 models by hand polishing internal parts and replacing springs. The result is a light consistent trigger pull and a smooth lever-throw or hammer pull. This work is available on any 1873 single action revolver or 1873 lever action rifle. Tuning is highly recommended, especially for competitors, however it is sold as an upgrade so you can still get favorites non-tuned. Our Taylor Tuned rifles and revolver have traditional beauty with tried-and-true performance making them a favorite amongst lever action and single-action enthusiasts alike.

Look for the Taylor Tuned symbol throughout the catalog on the models we offer this upgrade for.

Picture a dusty road. A stagecoach. The epitome of a rough rider sporting one hell of a sidearm. Now firmly plant that perfect demonstration of old west toughness in the 21st Century. That's the Smoke Wagon—a secondgeneration, single-action revolver with a steely history made for modern utility.

TAYLOR'S TIP: What is checkering on the grip for? It allows for easy handling, and stabilizing the revolver in your hand. Checkering is textured to give a little support and extra grip in the harshest of conditions or the heat of the competition.

THE SMOKE WAGON™ - 4.75"

TAYLOR'S TIP:

The Smoke
Wagon™ has
been a leader
in the Taylor's
line since
2007. The first
tuned revolver
offered - this is
where the rise
of performance
single action
revolvers all
started.

Gunslingers & collectors will appreciate the look and function of the slim, textured grip, which provides control and comfort for improved aim.

THE RUNNIN' © COMANCHERO CARBINE

A Taylor's exclusive, the Runnin' Comanchero® Carbine is specifically designed with the mounted shooter in mind. It has a short 16-1/8" barrel and is versatile and lightweight. The rear sight dovetail is filled and the front sight rounded for ease of removal from a scabbard. It has a blue frame and round barrel and features custom links and a short-stroke action. An elk leather butt cover and lever wrap complete the piece. This firearm is a great companion to the Runnin' Iron® revolver. A ladderstyle factory sight is included in the box with the carbine.

TAYLOR'S TIP:

The Runnin' Comanchero® is the choice for mounted shooters. The handy length makes it easy to maneuver on horseback.

1873 CATTLEMAN 1873 CATTLEMAN PHOTO-ENGRAVED

A Taylor's original, the photo-engraved revolver begins with laser engraving and then is hand-chased for depth and clarity.

The white finish has a satin look. Coin Finish models are a two-tone look for something different. Manufactured with forged frame.

TAYLOR'S TIP: Remember we always have special options of engraved models in stock As us about our inventory in "The Vault."

1875 NO. 3 - 2ND MODEL SCHOFIELD

Designed by Major George Schofield to be operated and reloaded with one hand while on horseback, this is a throwback to mounted soldiers in the U.S. Cavalry. This style pistol also has notoriety after being used by the likes of Jesse James and Wild Bill Hickok. The standard finish is a blue frame, barrel, backstrap, and case-hardened trigger guard. This model is available in many special finish configurations.

Grip: Smooth Walnut | No. of Shots: 6 | Total Length*: 11" | Weight*: 2.6 lbs.

TAYLOR'S TIP: The primary differences between a C. Mason and Open-Top model are the rear sight placement and the barrel shapes available. The rear sight on back of barrel on open top, rear sight notch in hammer on C. Mason. And the 1871-1872 Open-Top comes in all round barrels, while the C. Mason offers both round and octagonal barrels. There is a prominent "ring" (breech plate) housing the loading gate on the C. Mason, while the Open Top has a more sleek look with the loading gate in the frame.

THE 1871-1872 OPEN-TOP CONVERSIONS ©

Although it looks like a conversion, the model 1872 Open Top was Colt's® first revolver specifically manufactured to fire a cartridge. Since Colt® did not use percussion revolver parts, the revolver was manufactured as an entirely new model, first with Navy-sized grips, later with Army-sized grips. All come standard with case-hardened frame and blue barrel finish.

OPEN TOP EARLY MODEL (NAVY) CONVERSION

Features Navy grip, round barrel, brass furnishings. Manufactured with forged frame. Nickel finish available by request. The Cavalier® model features a polymer black grip.

THE 1875 ARMY JTLAW REVOLVER

This is a faithful reproduction of the 1875 Remington® single-actions, which kept the solid frame and overall styling of the Remington's 1858 percussion models. Ordinary citizens and Old West lawmen recognized the sturdy quality of the new Remington revolvers. The infamous Frank James even carried one for most of his outlaw career. The reproduction is available in his favorite caliber, .45 Colt®, and features a two-piece walnut grip. This model is manufactured with a forged frame. Special finishes include nickel and white photo engraved.

KEY TERMS

THE 1860 HENRY RIFLE

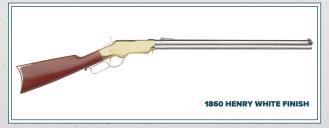

In October 1860, B.T. Henry was granted a patent for the design of a new repeating rifle that used metallic cartridges - the first in history. It allowed one person to load 15 cartridges in eight to ten seconds, which was the equivalent of 15 men armed with traditional firearms. It was so innovative, the gun was named after its inventor, Henry, and its cartridges bore his initial, H. All models feature a walnut stock and octagon barrel, and the barrel has an integrated magazine tube and an external cartridge follower.

1866 RIFLE & YELLOWBOY

When Nelson King patented his new loading system, he had no idea his 1866 model would play a prominent part in the winning of the West. The 1866, or "Yellowboy," as it was famously known because of its shiny brass frame, was the successor to the Henry. Production began in 1866 and continued through 1898, a period when both rifles and carbines were introduced.

THE 1865 SPENCER RIFLE

We're proud to offer a recreation of a firearm first produced by Christopher Miner Spencer, one of the leading figures of the machine tool industry. When Spencer originally produced an 1860 model carbine, it was different from any other firearm because it was accurate, fired rapidly, had a long effective range, and held seven metallic cartridges so they weren't affected by moisture. It could be fired more rapidly than a Colt®-style revolver and reloaded in one-tenth the time. In 1865, the gunmaker delivered the 1865 Spencer Carbine, which was modified to correct flaws inherent in the 1860 design. Today, the 1865 Spencer, in carbine and rifle, features a case-hardened frame, blue barrel and walnut stock.

1876 CENTENNIAL RIFLE

Introduced in 1876, this was one of the first lever-action firearms to chamber heavier, centerfire ammunition with enough power to hunt bears or bison. Its capability was also appealing to notorious outlaws such as Johnny Ringo and Tom Horn. The 1876 features chamber options of the original cartridges.

SPRINGFIELD TRAPDOOR

This U.S. Cavalry Carbine model of the Springfield Trapdoor follows the original perfectly. After the Civil War ended in 1865, muzzle-loading muskets were replaced with metallic cartridge rifles. During the transition, several models emerged to become the American military standard, remaining so even four decades later during the Spanish-American War in 1898 and 1899.

1885 SINGLE-SHOT RIFLE

Using the Browning patent, the 1885 Single Shot was produced from September 1885 through the end of 1920, a period when target shooting was extremely popular. The Single Shot was beautiful, strong, and well-made in every detail.

TAYLOR'S TIP: Some great sight options are available for the 1885 Single Shot Rifle Series.

HIGH WALL SPORTING RIFLES

Pedersoli brings the classic 1885 rifle to life with a broached rifled barrel made of high carbon steel in matte blue. It is equipped with a single-set trigger, pistol grip stock and a large buttplate. The rifle is drilled and tapped to mount a suitable tang sight matched with a tunnel front sight. The "Classic" version differentiates for the lever shape.

Total Length: 35.9" | Weight: 5.04 lbs.

THE 1874 SHARPS

The Sharps sporting rifle became known as "Old Reliable" by those who hunted buffalo for their hides. Reproducing the Sharps models at a reasonable price was a challenge for modern manufacturers because of its sliding breech-block and large, angular receiver. Taylor's has met this challenge and is able to offer a wide variety of the most popular Sharps models for hunting and target shooting. The Cavalry models feature the traditional single trigger action, forend band, and round barrel. The small Betsy model was redesigned to decrease weight in every way possible while keeping an elegant finish. Our line includes many long barreled sporting models and the preferred long distance shooting Down Under models.

TAYLOR'S TIP: The Sharps Rifles are iconic. A full line of sight options are available as well as Malcolm Scope options.

THE ROLLING BLOCK FAMILY

One of the most widely produced and notable rifles from 19th Century America was the Rolling Block Rifle. The simplistic action was easy to operate, but built to be extremely sturdy, utilizing an interlocking system of both the hammer and the breech. Several variations of the rifle were produced, and its popularity is clear in its impressive production history from 1867 to 1934. The Creedmore No. 2 and John Bodine models are perfectly designed for any shooting sport including long distance. These models are fit with heavier barrels and precise actions to perform flawlessly.

THE 1883 BURGESS®

The product of a number of designs patented by Andrew Burgess between 1873 and 1882, the Colt -Burgess Rifle was an enhancement of the Whitney-Burgess. Marketed by Colt, the product had a short run through no fault of its own. Colt stopped making lever-action guns in 1885 after producing only 3,810 rifles and 2,593 carbines when Winchester, threatened by Colt's encroachment into the lever-action rifle business, made it known that it planned to go after Colt's single-action revolver business.

THE LIGHTNING PUMP ACTION

The Lightning's aesthetics have been maintained, but modifications have been made to make the gun safer and easier to obtain a modern mechanism suitable to the needs of our times.

- Bolt is designed and built to ensure that it's fully engaged prior to firing
- Extractor has a separate spring to provide more reliable extraction and longer service life
- Unloading latch provides safer unloading

TAYLOR'S TIP: Lightning rifles manufactured by Uberti are sometimes in stock.

- Inertia firing pin design provides additional safety by keeping the pin from striking the primer by any other means than the pulling of the trigger.
- Improved magazine and loading gate for reliable loading and feeding

uitable to the needs of		
our times.

THE 1847 WALKER

With a 9-inch round barrel and weighing more than four pounds, the Colt® Walker was a weapon for the toughest soldiers and lawmen on the frontier. Prior to the introduction of the .357 Magnum in 1935, no revolver was more powerful. Inspired by Captain Samuel H. Walker of the U.S. Mounted Rifles, it fired .44 caliber balls "cast 32 to the pound." The deadly effects of the Walker's power during the Mexican War proved that revolvers had a place in battle. These models feature all forged steel frames and many forged parts.

TAYLOR'S TIP: A Walker Kit is available online. Check it out! Item 0021

HOWDAH HUNTER PISTOL

ITEM	MODEL	CALIBER	BARREL LENGTH	FINISH NOTES
210234	HOWDAY HUNTER BLACK POWDER PISTOL (PEDERSOLI)	20 GAUGE	11.25"	BLUE FINISH C/H FRAME - WALNUT STOCK

No. of Shots: 2 | Total Length: 17.75" | Weight: 5.07 lbs.

This is a classic pistol with side-by-side barrels reproducing the Anglo-Saxon style used for hunting in the second half of the 1800s in the far colonial territories and India. During the first period of the British colonial government in India, Howdah pistols were preferred by the officers of the English army for their power and reliability, but the main use was at close range to stop dangerous wild animals from leaping on elephants' backs. Howdah is the name of the palanquin mounted on the elephant. The locks are embellished with engraving featuring wild animals in their natural habitat and have a case-hardened color finish. The walnut pistol grip stock has two checkered sections to grant a firm, comfortable and stable grip, thanks to the counterweight buttplate.

(7)

THE 1848 DRAGOON

Developed in 1848, the Colt® Dragoon was issued in pairs as service firearms to members of the U.S. Army's Mounted Rifles 1st Cavalry, the first of many units known as Dragoons. The revolver had a long and distinguished history in military and civilian service during the 1850s and 1860s, including its use in the Civil War. Uberti models feature all forged steel frames and many forged parts.

THE 1860 ARMY REVOLVER

The 1860 Army was adopted as U.S. government ordnance because of its lighter weight, improved balance, and superior ballistics. This 6-shot, round-barrel percussion revolver became very popular with mounted troops and went on to be the issue sidearm for the U.S. Army for many years.

THE 1858 REVOLVING CARBINE

The well-built model 1858 design carried over into a revolving carbine version. It is still a popular model today with its increased range and ease of changing cylinders.

THE 1851-1861 NAVY REVOLVER

The 1851 Navy was produced from 1851 to 1872 and was the most famous of the cap-and-ball era for good reason. The 6-shot offers perfect balance, precise aim, and dependability. Taylor's & Co. offers a wide selection of calibers, barrel lengths, and frame styles of this gun, which has come to symbolize the days of the stagecoach, Pony Express, and the Civil War. Uberti models feature all forged steel frames and many forged parts.

THE 1862 POLICE & POCKET NAVY

Built stronger and with a larger caliber, these pocket-sized revolvers represented the advancement of earlier models like the 1849 Pocket. Barrel lengths up to 6-1/2" maximized velocity and accuracy in the performance of the gun's powerful .36-caliber chambers. These models feature all forged steel frames and many forged parts.

THE 1858 REMINGTON

The Colt® 1836 patent expired in 1857, and the next year, Remington introduced a solid-frame design that was both elegant and reliable. The 1858 Remington became so famous that it was the prevailing choice of military officers following the Civil War. Uberti models feature all forged steel frames and many forged parts.

1859-1863 **BLACK POWDER SHARPS**

Pedersoli began making paper cartridge Sharps models with the finest materials and craftsmanship. Many parts are machined from forged metals for maximum strength and durability, and the deep rifling is broached to ensure excellent results in long-distance shooting. The Sporting model has an octagonal barrel, rust brown finish, adjustable front sight, and set trigger. The Infantry and Cavalry models feature a blue round barrel, fixed front sight, and patchbox on the stock. The Infantry model also comes in the Berdan version, equipped with double set trigger.

THE CIVIL WAR MUSKET FAMILY

1861 SPRINGFIELD MUSKET

This rifled musket with the lock marking "1861 Springfield" and an eagle, was the principal firearm of the Civil War. At the end of 1863, most federal infantrymen were armed with either the Springfield or the 1853 3-Band Enfield Musket. Features a swelled ramrod, like the original muskets. NSSA approved.

1862 C.S. RICHMOND MUSKET

Manufactured by the Richmond Armory from 1861 to 1865, the C.S. Richmond Musket is known for its accuracy and was produced in larger numbers than all other Confederate long arms manufactured during the Civil War. Features a one-piece barrel of forged steel with "VP" and an eagle head stamped to the left of the breech. NSSA approved.

1853 3-BAND ENFIELD

This musket saw service by both the Northern and Southern troops during the Civil War. The Enfield replica has all the features of the original, including a one-piece, oil-finished walnut stock; blue barrel; original-style barrel bands; and brass nose cap. NSSA approved.

1858 2-BAND ENFIELD

The well-balanced 2-Band Enfield Musket saw extensive service during the Civil War. This excellent replica features an oil-finished walnut stock, case-hardened percussion lock; and correct period screws. Features a brass nose cap. NSSA approved.

1863 "ZOUAVE" REMINGTON MODEL

The Zouave was recognized by experts as one of the better-made long arms of the Civil War era. Taylor's & Co. offers a faithful reproduction of this popular rifle. It features a blue barrel and brass patch box and barrel bands. The case-hardened lock is marked "US," with an eagle.

NSSA approved.

THE 1842 MUSKET

Notable for being a .69-caliber musket, this was the first weapon made at both the Harpers Ferry and Springfield Armories with completely interchangeable parts. More than a quarter of a million of these muskets were manufactured from 1844 to 1855. Our reproductions are true to original measurements. NSSA approved.

THE 1873 CATTLEMAN BLACK POWDER

The 1873 Cattleman Blackpowder is manufactured by Uberti just like the standard cartridge 1873 Cattleman revolvers. It is a great option for people who want the look of the 1873 Single Action without needing to use cartridge ammunition. These models feature all forged steel frames and many forged parts.

THE KENTUCKY RIFLE

This is one of the most popular American long guns. It is furnished with a brass buttplate, trigger guard, large patch box, side plate, thimbles, and nose cap. The one-piece stock is oil-finished walnut, and the lock plate is case-hardened. Features a blue barrel finish; blade front sight, and steel, open rear sight. The bore is rifled with 8 grooves.

KEY TERMS

WM. MALCOLM SCOPES

Produced by the Wm. Malcolm Rifle Telescope Company during the late 1800s, the company's rifle telescopes were considered the finest of their day. These scopes work for rifles from late-model percussion muzzle-loaders, through the black powder cartridge rifle era, to the early smokeless cartridge rifles. All scopes models come standard with authentically styled mounts.

CONVERSION CYLINDERS

A CYLINDER CHANGE CONVERTS CAP AND BALL REVOLVERS FROM PERCUSSION TO CARTRIDGE

Now, you can switch back and forth from black powder to centerfire by changing the cylinder. The cylinder and plate fit together without screws or threads, so reloading is simple: pull the cylinder pin, drop out the cylinder, and lift off the plate with your fingers.

Only certified 4150 arsenal-grade steel is used in the production of these cylinders and top-plates to offer superior quality and strength and ensure safety and durability.

Use only lead bullet ammunition (smokeless or black powder) that does not exceed 850 FPS; Never use hot or jacketed ammunition.

Spare conversion cylinder parts are available online including firing pins and ferrules.

1858 REMINGTON CONVERSION CYLINDERS

Exclusively from Taylor's & Co., these conversion cylinders are manufactured to fit Remington 1858 steel-frame revolvers by Uberti® or Pietta in .36 or .44 calibers. One of the most popular conversions, this 6-shot cylinder converts 1858 .36 calibers to .38 SP and converts .44 calibers to .45 LC ammunition only.

1863 POCKET REMINGTON CONVERSION CYLINDER

The model P1863 is for the steel frame 1863 Remington Pocket model manufactured by Pietta. Converts the .31 caliber "Remington" to fire the .32 S&W cartridge, for those who prefer the "Remington" design revolvers over the 'Colt' style revolvers. Great for side matches and to add some variety to your black powder collection.

1131	.45 LC/SCHOFIELD	BLUE	PIETTA

CONVERSION CYLINDER FERRULE REMOVAL TOOL

This tool is used to remove the ferrules from your conversion cylinder cap. The ferrule is a small ring that screws down over the firing pin to hold it in the cap.

SPARE PARTS KITS

These spare parts kits are designed to meet shooters' needs. Only the most commonly replaced parts are included to ensure you are not out of luck the next time you lose a screw, misplace a spring, or have a mishap that causes your gun to be out of commission for a couple weeks. Taylor's also stocks individual parts for most of our product line—use our online schematics to order at taylorsfirearms.com!
